Author index for Volume 3

Abott, J. A., M. Campbell, J. A. Bussell and R. C. Lim. Blood flow in end-to-side arteriovenous fistulas and saphenous vein grafts 342

Abrams, Herbert L., See Hollenberg, Sandor, Conroy, Adams, Solomon, Abrams and Merrill 177

Adam, Christianne, Liliane Morel-Maroger and Gabriel Richet. Cryoglobulins in glomerulonephritis not related to systemic disease 334

Adams, Douglass, F., See Hollenberg, Sandor, Conroy, Adams, Solomon, Abrams and Merrill 177

Agnello, Vincent, David Koffler and Henry G. Kunkel. Immune complex systems in the nephritis of systemic lupus erythematosus 90

Alleyne, George A. O., See Klahr and Alleyne 129

Allison, Margorie, E. M., Eleanor M. Lipham, William E. Lassiter and Carl W. Gottschalk. The acutely reduced kidney 354

Andres, Giuseppe A., See Sugisaki, Klassen, Andres, Milgrom and McCluskey 66

Antoniou, Lucy D, Thomas J. Burke, Roscoe R. Robinson and James R. Clapp. Vasopressin-related alterations of sodium reabsorption in the loop of Henle 6

Ashcroft, Rosalind A., See Von Hartitzsch, Hoenich, Samson, Erickson, Ashcroft and Kerr 35

Atkins, Robert C., Charles Mion, Ernest Despaux, Nguyen Van-Hai, Christian Julien and Henri Mion. Peritoneal transfer of kanamycin and its use in peritoneal dialysis 391

Barjon, P., See Charra, Huchard, Mion and Barjon 51

Barratt, Lindsay J., See Wallin, Barratt, Rector and Seldin 282

Bartoli, Ettore and Laurence E. Earley. Importance of ultrafilterable plasma factors in maintaining tubular reabsorption 142

— Measurements of nephron filtration rate in the rat with and without occlusion of the proximal tubule 372

Beirne, Gregory J., See Hyman, Wagnild, Beirne and Burkholder 397

Bennett, Boyce, See Olbing, Greifer, Bennett, Bernstein and Spitzer 381

Berger, Hermes, See Schultze and Berger 291

Bernstein, Jay, See Olbing, Greifer, Bennett, Bernstein and Spitzer 381

Blagg, Christopher R., See Peoples, Cole, Vizzo, Leith and Blagg 190

Boner, Geoffrey, Margaret Newton and Richard E. Rieselbach. Exaggerated carbohydrate-induced calciuria in the remaining kidney of transplant donors 24

Brickman, Arnold S., See Coburn, Koppel, Brickman and Massry 264

Brunette, Michele G., See Friborg, Mousseau, Brunette and Carriere 298

Burke, Thomas J., See Antoniou, Burke, Robinson and Clapp 6

Burkholder, Peter M., See Hyman, Wagnild, Beirne and Burkholder 397

Bussell, J. A., See Abbott, Campbell, Bussell and Lim 342

Caglar, Sali, See Gradowska, Caglar, Rutherford, Harter and Slatopolsky 230

Campell, M., See Abbott, Campbell, Bussell and Lim 342

Carriere, Serge, Norman L. M. Wong and John H. Dirks. Redistribution of renal blood flow in acute and chronic reduction of renal mass 364

Carriere, Serge, See Friborg, Mousseau, Brunette and Carriere 298

Charra, B., G. Huchard, C. Mion and P. Barjon. A dye-dilution cardiac output technique for hemodialyzed patients with arteriovenous fistula 51

Clapp, James R., See Antoniou, Burke, Robinson and Clapp 6

Clarkson, E. M., J. B. Eastwood, K. G. Koutsaimanis and H. E. de Wardener. Net intestinal absorption of calcium in patients with chronic renal failure 258

Coburn, Jack W., Marcelo H. Koppel, Arnold S. Brickman and Shaul G. Massry. Intestinal absorption of calcium in patients with renal failure 264

Cole, James J., See Peoples, Cole, Vizzo, Leith and Blagg 190

Conroy, Margaret, See Hollenberg, Sandor, Conroy, Adams, Solomon, Abrams and Merrill 177

Cooke, C. Robert, Francisco Ruiz-Maza, Avinoam Kowarski, Claude J. Migeon and W. Gordon Walker. Regulation of plasma aldosterone concentration in anephric man and renal transplant recipients 160

— See Walker and Cooke 1

Davis, Neil C., See West, Ruley, Forristal and Davis 116

Despaux, Ernest, See Atkins, Mion, Despaux, Van-Hai, Julien and Mion 391

de Wardener, H. E., See Clarkson, Eastwood, Koutsaimanis and DeWardener 258

Dirks, John H., See Carriere, Wong and Dirks 364

Dixon, Frank J., See Kunkel and Dixon 55

— See Marquardt, Wilson and Dixon 57

— See Wilson and Dixon 74

Drüeke, Tilman, See Ganeval, Marche and Drüeke 222

Earley, Laurence E., See Bartoli and Earley 142
— See Bartoli and Earley 372
— See Schrier, Lehman, Zacherle and Earley 30
Eastwood, J. B., See Clarkson, Eastwood, Koutsaimanis and de Wardener 258
Edelmann, Chester M., Jr., See Spitzer and Edelmann with Goldberg and Henneman 251
Erickson, Jennifer, See von Hartitzsch, Hoenich, Samson, Erickson, Ashcroft and Kerr 35

Fish, Alfred V., See Michael, McLean, Roy, Westberg, Hoyer, Fish and Vernier 105
Fischetti, Vincent A., See Zabriskie, Utermohlen, Read and Fischetti 100
Forristal, Judith, See West, Ruley, Forristal and Davis 116
Franko, Elisabeth, A., See Singer and Franko 151
Friborg, Jacques, Roger Mousseau, Michele G. Brunette and Serge Carriere. Repercussions hemodynamiques renales de la surcharge salee aigue isotonique chez le chien 298
Frost, T. H., D. Jolly and D. N. S. Kerr. Effect of membrane grain orientation on *in vitro* performance of a Kiil dialyzer 186

Ganeval, Dominique, Claudie Marche and Tilman Drüeke. Perfusion of an isolated jejunal loop in uremic rats: Effect of sodium deoxycholate 222
Glassock, Richard J., See Schoenfeld and Glassock 309
Goldberg, Lee D., See Spitzer and Edelmann with Goldberg and Henneman 251
Gottschalk, Carl W., See Allison, Lipham, Lassiter and Gottschalk 354
Gradowska, Liliana, Sali Caglar, Ernest Rutherford, Herschel Harter and Eduardo Slatopolsky. On the mechanism of the phosphaturia of extracellular fluid volume expansion in the dog 230
Greifer, Ira, See Olbing, Greifer, Bennett, Bernstein and Spitzer 381

Harter, Herschel, See Gradowska, Caglar, Rutherford, Harter and Slatopolsky 230
Henderson, Lee W. The problem of peritoneal membrane area and permeability 409
Henneman, Philip H., See Spitzer and Edelmann with Goldberg and Henneman 251
Hoenich, Nicholas A., See von Hartitzsch, Hoenich, Samson, Erickson, Ashcroft and Kerr 35
Hollenberg, Norman K., Tamas Sandor, Margaret Conroy, Douglass F. Adams, Harold S. Solomon, Herbert L. Abrams and John P. Merrill. Xenon transit through the oliguric human kidney: Analysis by maximum likelihood 177
Hoyer, John, R., See Michael, McLean, Roy, Westberg, Hoyer, Fish and Vernier 105
Huchard, G., See Charra, Huchard, Mion and Barjon 51

Hyman, Lawrence R., Joh P. Wagnild, Gregory J. Beirne and Peter M. Burkholder. Immunoglobulin-A distribution in glomerular disease: Analysis of immunofluorescence localization and pathogenic significance 397

Johannessen, Jan Vincents. Rapid processing of kidney biopsies for electron microscopy 46
Johnson, William J., See Port, Johnson and Klass 327
Jolly, D., See Frost, Jolly and Kerr 186
Julien, Christian, See Atkins, Mion, Despaux, Van-Hai, Julien and Mion 391

Kerr, D. N. S., See Frost, Jolly and Kerr 186
— Provision of services to patients with chronic uremia 197
— See von Hartitzsch, Hoenich, Samson, Erickson, Ashcroft and Kerr 35
Klahr, Saulo, and George A. O. Alleyne. Effects of chronic protien-calorie malnutrition on the kidney 129

Subject index

Abstracts
  European Dialysis and Transplant Association, June 28–30, 1973, 1A
  Société de Néphrologie, November 25, 1972, 193
  Société de Néphrologie, February 3, 1973, 411
  Swiss Society of Nephrology, December 16, 1972, 273
  The Renal Association, October 25, 1972, 412
  The Renal Association, February 22, 1973, 413
Acidosis
  renal tubular acidosis and a defect in potassium transport, 251
Acute renal failure
  after antibiotic treatment (abstr.), 193
  pathogenesis (abstr.), 414
Acute reduction of renal mass
  micropuncture study, 354
  redistribution of renal blood flow, 364
ADH
  effect of isoproterenol on release in man (abstr.), 6A
  lithium-induced resistance to ADH in toad bladders, 151
Aldosterone
  and ATPase in adrenalectomized rats (abstr.), 276
  and renin in dialyzed patients (abstr.), 10A
  and renin in uremia (abstr.), 273, 10A
  in anephric man and transplant recipients, 1, 160
Alpha-aminoisobutyric acid
  and PAH uptake in rat kidney slices, 205
Amiloride
  and lithium-induced ADH resistance in toad bladder, 151
Angiotensin
  and glomerular contractility (abstr.), 273
Anephric state
  regulation of plasma aldosterone, 1, 160
Announcements 54, 126, 195, 277, 345, 416
Antibody
  antiGBM antibody-induced glomerulonephritis, 74
AntiGBM antibody
  and glomerulonephritis, 74
  detection by radioimmunoassay (abstr.), 414
Antigens
  isolation of glomerular basement membrane antigens, 57
  in normal urine, 309
Ascending limb
  relationship between flow rate and chloride delivery and sodium reabsorption, 282
Autoradiography
  distribution and uptake of PAH, 205, 214
  during saline diuresis, 364

Basement membrane
  antiGBM antibody-induced glomerulonephritis, 74
  in hereditary nephritis (abstr.), 414
Basement membrane antigens
  isolation and characterization, 57
Biopsy
  rapid processing for electron microscopy, 46
Blood flow
  in A-V fistulae and saphenous vein grafts, 342
  photoelectric measurement during hemodialysis, 190
  redistribution of renal blood flow with reduction of renal mass during saline diuresis, 364

Calcium
  carbohydrate-induced calciuria in transplant donors, 24
  intestinal absorption in chronic renal failure, 258, 264
Calcium absorption
  in patients with renal failure, 258, 264
Calories
  effect of caloric deprivation on renal function, 129
Cardiac output
  in hemodialysis (abstr.), 194
  measured via A-V fistulae, 51
Cephalosporin
  pharmacodynamics (abstr.), 193
Chloride depletion
  effect on $T^c_{H_2O}$ formation, 282
Chronic renal failure
  effect of caloric intake and nitrogen balance (abstr.), 413
  intestinal calcium absorption, 258, 264
  plasma renin (abstr.), 413, 10A
  provision of services to patients, 197
Coagulation
  in uremia (abstr.), 193
Coil hemodialyzer
  evaluation, 35
Complement
  hypocomplementemic glomerulonephritis, 116
  in membranoproliferative glomerulonephritis (abstr.), 411, 5A
Concentrating mechanism
  relationship between flow rate, chloride delivery and $T^c_{H_2O}$ formation, 282
Cryoglobulins
  in glomerulonephritis, 334

Diabetes insipidus
  lithium-induced ADH resistance, 151

Dialysate
high sodium concentration to prevent disequilibrium, 327
Dialysis
and peripheral neuropathy (abstr.), 2A
chronic peritoneal (abstr.), 9A
effect of membrane orientation on performance, 186
effect on plasma aldosterone and plasma renin activity (abstr.), 10A
intensive utilization of a dialysis unit (abstr.), 2A
membrane support and thrombus formation (abstr.), 10A
peritoneal permeability, 409
peritoneal transfer of kanamycin, 391
photoelectric measurement of blood flow, 190
portable artificial kidney system (abstr.), 6A
prevention of disequilibrium syndrome, 327
third European combined report, 1972 (abstr.), 4A
with membrane permeable to middle molecules (abstr.), 7A
Disequilibrium syndrome
prevention during dialysis, 327

Edema
effect of furosemide on water excretion in edematous patients, 30
Editorial
a progress report, 279
effects of chronic protein-calorie malnutrition on the kidney, 129
introduction to immunological aspects of renal disease, 55
plasma aldosterone regulation in anephric man, 1
provision of services to patients with chronic uremia, 197
site and control of phosphate reabsorption by the kidney, 347
Electron microscopy
of glomerular basement membrane in long-term allografts with heavy proteinuria (abstr)., 7A
peroxidase transport in flounder tubule, 317
rapid processing of kidney biopsies, 46
Endocytosis
transport of peroxidase in flounder tubules, 315
Extracellular fluid volume
and relationship to GFR and glucose reabsorption, 291
expansion of ECF volume and phosphate excretion, 230
expansion of ECF volume and renal blood flow, 298
Extracorporeal circulation
measurement of blood flow during hemodialysis, 190

Fistula
hemodynamic studies (abstr.), 194
measurement of blood flow through vein grafts and fistulae, 342
use of A-V fistulae for determination of cardiac output 51
Flatplate disposable hemodialyzer evaluation, 35
Flounder tubule
transport of peroxidase, 315
Folate-induced renal failure
enzyme changes (abstr.), 274
tubular obstruction (abstr.), 274
Furosemide
effect on free water excretion in edema, 30
effect on stored kidneys (abstr.), 415

Glucose
carbohydrate-induced calciuria, 24
Glucose reabsorption
relationships to GFR and ECF volume, 291
Glomerular deposits
composition (abstr.), 412, 1A, 2A, 5A
Glomerular filtration rate
in experimental glomerulonephritis, 14
in single nephrons with and without proximal tubular occlusion, 372
relationship to glucose reabsorption, 291
Glomerulonephritis
antiGBM antibody-induced glomerulonephritis in humans, 74
clinicopathological correlations in acute glomerulonephritis (abstr.), 5A
cryoglobulins, 334
fibrin split-products (abstr.), 411, 1A, 4A
Goodpasture's syndrome (abstr.), 275
hypocomplementemic glomerulonephritis, 116
in association with immunoglobulin-A, 167
in lupus erythematosus, 90
membranous nephropathy in children, 381
micropuncture study in experimental disease, 14
progressive hereditary nephritis (abstr.), 414
streptococcus-related, 100
synthesis of GBM (abstr.), 412
transfer of Heymann nephritis, 66
urinary content of F.D.P., heterophile agglutinin, IgG, IgM and C3 (abstr.), 1A, 4A
Glomerulotubular balance
importance of ultrafilterable plasma factors, 142
Glomerular basement membrane antigen
isolation and characterization, 57
Glomerulus
antiGBM antibody-induced glomerulonephritis, 74
isolation of glomerular basement membrane antigen, 57

Hematuria
recurrent (abstr.), 412, 9A
with normal renal function (abstr.), 9A
Hemodialysis
blood level of middle molecular substances (abstr.), 2A, 3A, 7A
bovine carotid artery grafts as blood access devices (abstr.), 5A
evaluation of new hemodialyzers, 35
in premature and newborn babies (abstr.), 5A
in Switzerland (abstr.), 276

measurement of cardiac output via A-V fistulae, 51
measurement of blood flow in A-V fistulae, 342
membrane grain orientation and performance, 186
photoelectric measurement of blood flow, 190
prevention of disequilibrium syndrome, 327
reproductive potential in treated males (abstr.), 3A
Hemodynamics
in human cadaver kidney (abstr.),
xenon transit in oliguria, 177
Heterogeneity
nephron function in experimental glomerulonephritis, 14
Heymann nephritis
passive transfer with serum, 66
Hollow fiber dialyzer
evaluation, 35
Homoarginine
clearance in normal subjects and patients with cystinuria (abstr.), 413
Hyperbaria
effect on kidneys (abstr.), 414
effect on preservation of function in ischemic kidney (abstr.), 8A
Hyperkalemia
and a defect of potassium transport with short stature and acidosis, 251
Hypertension
external counting (abstr.), 194
low and high renin (abstr.), 273
urinary enzymes (abstr.), 411
Hypocomplementemia
mechanisms in glomerulonephritis, 116
Hyponatremia
after furosemide administration, 30

Immune complexes
in glomerulonephritis not related to systemic disease, 334
Immunofluorescence microscopy
in immunoglobulin-A glomerular disease 167
Immunoglobulin-A
in association with glomerulonephritis 167
Immunology
HL-A antigens in kidney tissue (abstr.) 9A
HL-A responsiveness after transfusion and renal transplantation (abstr.) 7A
Intestinal absorption
of calcium in uremia 258, 264

Jejunal loop
perfusion with deoxycholate, 222

Kanamycin
peritoneal transfer, 391
Kidney biopsy
evaluation with immunhistology and phase-contrast microscopy (abstr.), 5A
Kidney International
a progress report, 279
Kidney preservation
effects of hyperbaria and hypothermia on ischemic kidney damage (abstr.), 8A
storage in intracellular type solution (abstr.), 10A
Kiil hemodialyzer
evaluation, 35
membrane orientation, 186

Lanthanum
permeability of the tight junction in rat nephron, 238
Lithium
induction of ADH resistance in toad bladders, 151
Loop of Henle
vasopressin-related alterations of sodium reabsorption, 6
influence of flow rate and chloride on sodium reabsorption, 282
Lupus erythematosus
immune complex systems in lupus nephritis, 90
Lysosomes
and peroxidase transport in flounder tubules, 315

Macula densa
relationship to regulation of single nephron filteration rate, 372
Magnesium
and carbohydrate-induced calciuria, 24
Malnutrition
effect on renal function, 129
Maximum likelihood
xenon transit in oliguria, 117
Membrane
grain orientation and dialyzer performance, 186
Membranous nephropathy
in children, 381
Microperfusion
plasma factors and tubular reabsorption, 142
Micropuncture
compensatory adaptation (abstr.), 274
folate-induced renal failure (abstr.), 274
in acute reduction of renal mass, 354
in experimental nephrotic syndrome, 14
measurements of nephron filtration rate, 372
plasma factors and tubular reabsorption, 142
Multipoint hemodialyzer
evaluation, 35

Nephrotic syndrome
hyperlipemia (abstr.), 275
immunological aspects, 105
micropuncture study in experimental disease, 14
proximal tubular reabsorption and sodium retention (abstr.), 1A
seasonal (abstr.), 412

P-aminohippuric acid
uptake and distribution in tissue slices, 205, 214
Pericarditis
ECHO cardiography (abstr.), 275
treatment of uremic pericardial effusion with drainage and steroid instillation (abstr.), 2A
Peritoneal dialysis
bidirectional permeability of middle molecules (abstr.), 1A
use of kanamycin, 391
peritoneal permeability, 409
Peroxidase
transport by flounder tubules, 315
Phosphate
excretory mechanism during expansion of ECF volume in dog, 230
site and control of renal excretion, 347
Postural effects
and regulation of aldosterone in anephric man, 160
Potassium
and regulation of aldosterone secretion, 160
and regulation of plasma aldosterone, 1
transport defect in patient with short stature and acidosis, 251
Proteinuria
in hypertension (abstr.), 411
Protein
effect of protein deprivation on renal function, 129
tubular transport, 315
Protein transport
peroxidase transport in flounder tubule, 315
Proximal tubules
importance of plasma factors on reabsorption, 142
effect of proximal occlusion on SNGFR, 372

Reabsorption
plasma factors and tubular reabsorption, 142
Reduced renal mass
histology after partial nephrectomy (abstr.), 274
micropuncture study, 354
redistribution of blood flow, 364
Renal osteodystrophy
chroniological appearance of clinical signs (abstr.), 11A
Calcium loss measured by neutron activation analysis (abstr.), 3A
in children (abstr.), 7A
in hemodialyzed patients (abstr.), 9A
plasma hydroxyproline in (abstr.), 10A
Renin
and aldosterone in dialyzed patients (abstr.), 10A
inactivation by kidneys (abstr.), 413

Saphenous vein grafts
measurement of blood flow, 342
Short stature
and transport defect for potassium, 251
Sodium
high sodium dialysate and prevention of disequilibrium, 327
retention in experimental glomerulonephritis, 14
vasopressin-related alterations of loop reabsorption, 6
Sodium deoxycholate
perfusion of intestinal loops, 222
Streptococcus
in glomerulonephritis, 100
Systemic lupus erythematosus
nephritis of, 90
treatment (abstr.), 193

Tight junction
permeability to lanthanum in the rat, 238
Toad bladder
lithium-induced ADH resistance, 151
Transplantation
and liver disease (abstr.), 7A
and vitality of kidney graft (abstr.), 7A
carbohydrate-induced calciuria in remaining kidney of living donors, 24
distribution and uptake of PAH, 205
distribution and uptake of PAH in tissue slices, 205, 214
FDP estimation in management of cadaver kidney transplants (abstr.), 1A, 4A
in Switzerland (abstr.), 276
intestinal calcium absorption, 264
long term histological effects on renal osteodystrophy (abstr.), 2A
malignant tumors following immunosuppression (abstr.), 1A
regulation of plasma aldosterone, 160
search for active enhancement in hemodialysis patients (abstr.), 3A
third European combined report, 1972 (abstr.), 4A
transfusions and renal allograft rejection (abstr.), 8A
urinary F.D.P., heterophile agglutinin, IgG, IgM, and C3 content in rejection (abstr.), 1A
Triamterene
and lithium-induced ADH resistance in toad bladders, 151
Tubular antigen
in normal urine, 309
Tubular reabsorption
importance of plasma factors, 142
phosphate reabsorption, 347

Uremia
abnormal metabolism of amino acids (abstr.), 6A
blood level of middle molecular substances (abstr.), 3A
effects of diet, dialysis, and transplantation on bone lesions (abstr.), 2A
effects of diuretics on renal hemodynamics (abstr.), 413
effects of starch on blood and fecal nitrogen in uremia (abstr.), 4A
fetal development (abstr.), 8A

histidine supplementation and uremic anemia (abstr.), 4A
intestinal calcium absorption, 258, 264
nitrogen removal from the intestinal tract (abstr.), 6A
perfusion of jejunal loops with dexoxycholate, 222
pharmacokinetics of glipizide (abstr.), 276
prevention of bone disease (abstr.), 8A
provision of services to patients, 197
regulation of plasma aldosterone, 1
sympathicopathy in uremic rats (abstr)., 5A
Uric acid
micropuncture study of excretion (abstr.), 275
Urine
antigens in normal urine, 309

Vasopressin
and altered sodium reabsorption by the loop of Henle, 6
Vitamin D
action of 1,25 dihydroxycholecalciferol in normal and uremic man (abstr.), 3A
and intestinal calcium absorption, 264
effects of 1,25 dihydroxycholecalciferol in patients with chronic renal failure (abstr.), 4A
proximal tubular acidosis (abstr.), 275
treatment of osteodystrophy in dialyzed patients (abstr.), 10A

Water diuresis
effect of vasopressin on loop sodium reabsorption, 6

Xenon
transit through oliguric human kidney, 177

Zonula occludens
permeability to lanthanum in the rat nephron, 238

Contents for Volume 3

January—June, 1973

Number 1, January 1973

Plasma aldosterone regulation in anephric man. *W. Gordon Walker and C. Robert Cooke* 1
Vasopressin-related alterations of sodium reabsorption in the loop of Henle. *Lucy D. Antoniou, Thomas J. Burke, Roscoe R. Robinson and James R. Clapp* . . 6
Micropuncture study in rats with experimental glomerulonephritis. *Antonino Rocha, Marcello Marcondes and Gerhard Malnic* 14
Exaggerated carbohydrate-induced calciuria in the remaining kidney of transplant donors. *Geoffrey Boner, Margaret Newton and Richard E. Rieselbach* 24
Effect of furosemide on free water excretion in edematous patients with hyponatremia. *Robert W. Schrier, David Lehman, Barry Zacherle and Laurence E. Earley* 30
A clinical evaluation of the new dialyzers. *Barry von Hartitzsch, Nicholas A. Hoenich, Pamela Samson, Jennifer Erickson, Rosalind A. Ashcroft and D. N. S. Kerr* 35
Rapid processing of kidney biopsies for electron microscopy. *Jan Vincents Johannessen* 46
A dye-dilution cardiac output technique for hemodialyzed patients with arteriovenous fistula. *B. Charra, G. Huchard, C. Mion and P. Barjon* . . . 51
Announcements 54

Number 2, February 1973

Introduction. *Henry G. Kunkel and Frank J. Dixon* . . 55
Isolation and immunological characterization of human glomerular basement membrane antigens. *Hans Marquardt, Curtis B. Wilson and Frank J. Dixon* 57
Passive transfer of Heymann nephritis with serum. *Tetsuzo Sugisaki, John Klassen, Giuseppe A. Andres, Felix Milgrom and Robert T. McCluskey* 66
Anti-glomerular basement membrane antibody-induced glomerulonephritis. *Curtis B. Wilson and Frank J. Dixon* 74
Immune complex systems in the nephritis of systemic lupus erythematosus. *Vincent Agnello, David Koffler and Henry G. Kunkel* 90
Streptococcus-related glomerulonephritis. *John B. Zabriskie, Virginia Utermohlen, Stanley E. Read and Vincent A. Fischetti* 100
Immunological aspects of the nephrotic syndrome. *Alfred F. Michael, Robert H. McLean, L. Paul Roy, N. Gunnar Westberg, John R. Hoyer, Alfred V. Fish and Robert L. Vernier* 105
Mechanisms of hypocomplementemia in glomerulonephritis. *Clark D. West, Edward J. Ruley, Judith Forristal and Neil C. Davis* 116
Announcements 126

Number 3, March 1973

Effects of chronic protein-calorie malnutrition on the kidney. *Saulo Klahr and George A. O. Alleyne* . . 129
Importance of ultrafilterable plasma factors in maintaining tubular reabsorption. *Ettore Bartoli and Laurence E. Earley* 142
Lithium-induced ADH resistance in toad urinary bladders. *Irwin Singer and Elizabeth A. Franko* . . 151
Regulation of plasma aldosterone concentration in anephric man and renal transplant recipients. *C. Robert Cooke, Francisco Ruiz-Maza, Avinoam Kowarski, Claude J. Migeon and W. Gordon Walker* 160
Immunoglobulin A (IgA) associated glomerulonephritis. *David C. Lowance, James D. Mullins and John J. McPhaul, Jr.* 167
Xenon transit through the oliguric human kidney: Analysis by maxim likelihood. *Norman K. Hollenberg, Tamas Sandor, Margaret Conroy, Douglass F. Adams, Harold S. Solomon, Herbert L. Abrams and John P. Merrill* 177
Effect of membrane grain orientation on *in vitro* performance of a Kiil dialyzer. *T. H. Frost, D. Jolly and D. N. S. Kerr* 186
Photoelectric measurement of blood flow during hemodialysis. *Ralph W. Peoples, James J. Cole, Joseph E. Vizzo, William C. Leith and Christopher R. Blagg* 190
Abstracts, Société de Néphrologie, November 25, 1972 193
Announcements 195

Number 4, April 1973

Provision of services to patients with chronic uremia. *D. N. S. Kerr* 197
The distribution of *p*-aminohippuric acid in rat kidney slices. I. Tubular localization. *Richard P. Wedeen and Barry Weiner* 205
The distribution of *p*-aminohippuric acid in rat kidney slices. II. Depth of uptake. *Richard P. Wedeen and Barry Weiner* 214
Perfusion of an isolated jejunal loop in uremic rats: Effect of sodium deoxycholate. *Dominique Ganeval, Claudie Marche and Tilman Drüeke* 222
On the mechanism of the phosphaturia of extracellular fluid volume expansion in the dog. *Liliana Gradowska, Sali Caglar, Ernest Rutherford, Herschel Harter and Eduardo Slatopolsky* 230
Lanthanum permeability of the tight junction (zonula occludes) in the renal tubule of the rat. *C. Craig Tisher and William E. Yarger* 238
Short stature, hyperkalemia and acidosis: A defect in renal transport of potassium. *Adrian Spitzer and Chester M. Edelmann, Jr. with Lee D. Goldberg and Philip H. Henneman* 251
Net intestinal absorption of calcium in patients with chronic renal failure. *E. M. Clarkson, J. B. Eastwood, K. G. Koutsaimanis and H. E. de Wardener* . 258
Intestinal absorption of calcium in patients with renal failure. *Jack W. Coburn, Marcelo H. Koppel, Arnold S. Brickman and Shaul G. Massry* 264
Abstracts, Swiss Society of Nephrology, December 16, 1972 273
Announcements 277

Number 5, May 1973

A progress report. *Roscoe R. Robinson* 279
The influence of flow rate and chloride delivery on $T^c_{H_2O}$ formation in the rat. *John D. Wallin, Lindsay J. Barratt, Floyd C. Rector, Jr. and Donald W. Seldin* 282
The influence of GFR and saline expansion on Tm_G of the dog kidney. *Raymond G. Schultze and Hermes Berger* 291
Repercussions hemodynamiques renales de la surcharge salee aigue isotonique chez le chien. *Jacques Friborg, Roger Mousseau, Michele G. Brunette et Serge Carriere* 298
Renal tubular antigen excretion in normal human urine. I. Immunochemical identification. *Leon S. Schoenfeld and Richard J. Glassock* 309
Transport of peroxidase in flounder kidney tubules studied by electron microscope histochemistry. *Peter D. Ottosen and Arvid B. Maunsbach* 315
Prevention of dialysis disequilibrium syndrome by use of high sodium concentration in the dialysate. *Friedrich K. Port, William J. Johnson and Donald W. Klass* 327
Cryoglobulins in glomerulonephritis not related to systemic disease. *Christianne Adam, Liliane Morel-Maroger and Gabriel Richet* 334
Blood flow in end-to-side arteriovenous fistulas and saphenous vein grafts. *J. A. Abbott, M. Campbell, J. A. Bussell and R. C. Lim* 342
Announcements 345
Abstracts, European Dialysis and Transplant Association, Vienna, Austria, June 28–30, 1973 . . . . . 1A

Number 6, June 1973

Site and control of phosphate reabsorption by the kidney. *Franklyn G. Knox, Edward G. Schneider, L. R. Willis, Jack W. Strandhoy and Cobern E. Ott* 347
The acutely reduced kidney. *Marjorie E. M. Allison, Eleanor M. Lipham, William E. Lassiter and Carl W. Gottschalk* 354
Redistribution of renal blood flow in acute and chronic reduction of renal mass. *Serge Carriere, Norman L. M. Wong and John H. Dirks* 364
Measurements of nephron filtration rate in the rat with and without occlusion of the proximal tubule. *Ettore Bartoli and Laurence E. Earley* 372
Idiopathic membranous nephropathy in children. *Hermann Olbing, Ira Greifer, Boyce P. Bennett, Jay Bernstein and Adrian Spitzer* 381
Peritoneal transfer of kanamycin and its use in peritoneal dialysis. *Robert C. Atkins, Charles Mion, Ernest Despaux, Nguyen Van-Hai, Christian Julien and Henri Mion* 391
Immunoglobulin-A distribution in glomerular disease: Analysis of immunofluorescence localization and pathogenetic significance. *Lawrence R. Hyman, Jon P. Wagnild, Gregory J. Beirne and Peter M. Burkholder* 397
The problem of peritoneal membrane area and permeability. *Lee W. Henderson* 409
Abstracts, Société de Néphrologie, Paris, France, February 3, 1973 411
The Renal Association, London, England, October 25, 1972 412
